Small and convenient

Smart identification of flushing size

with the rear secure

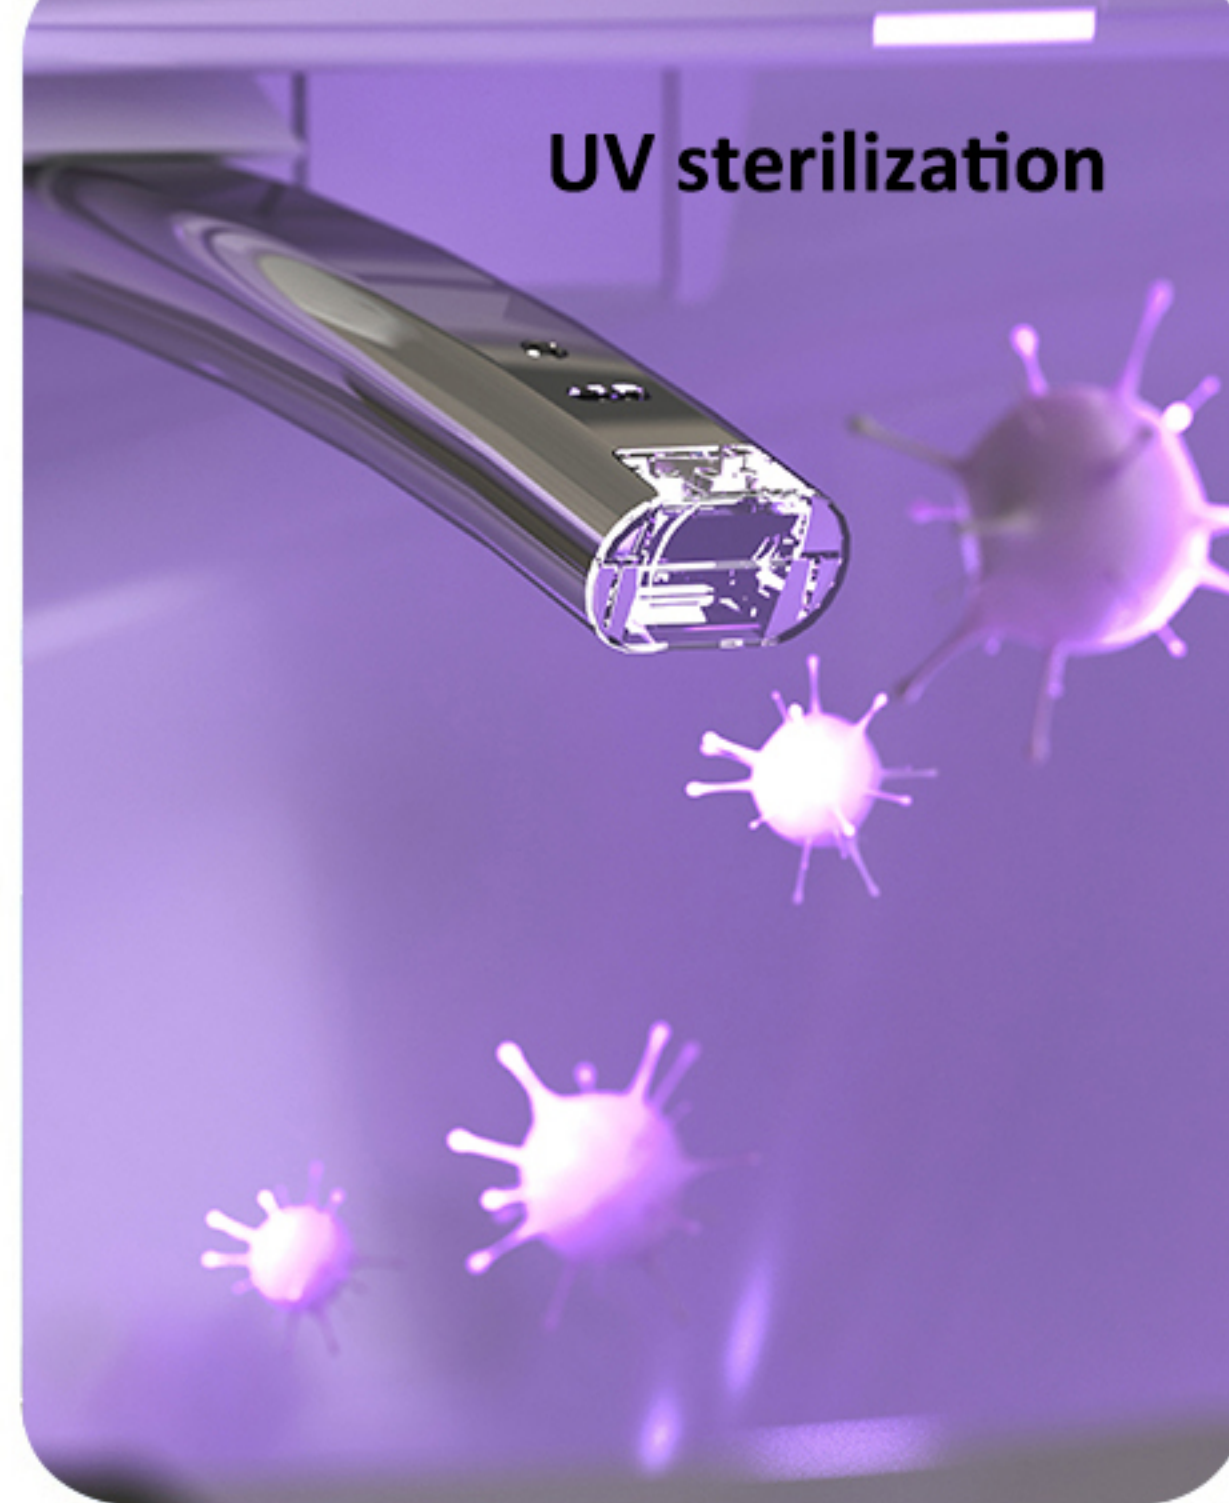

Foam shield

Splash-proof, odor-proof

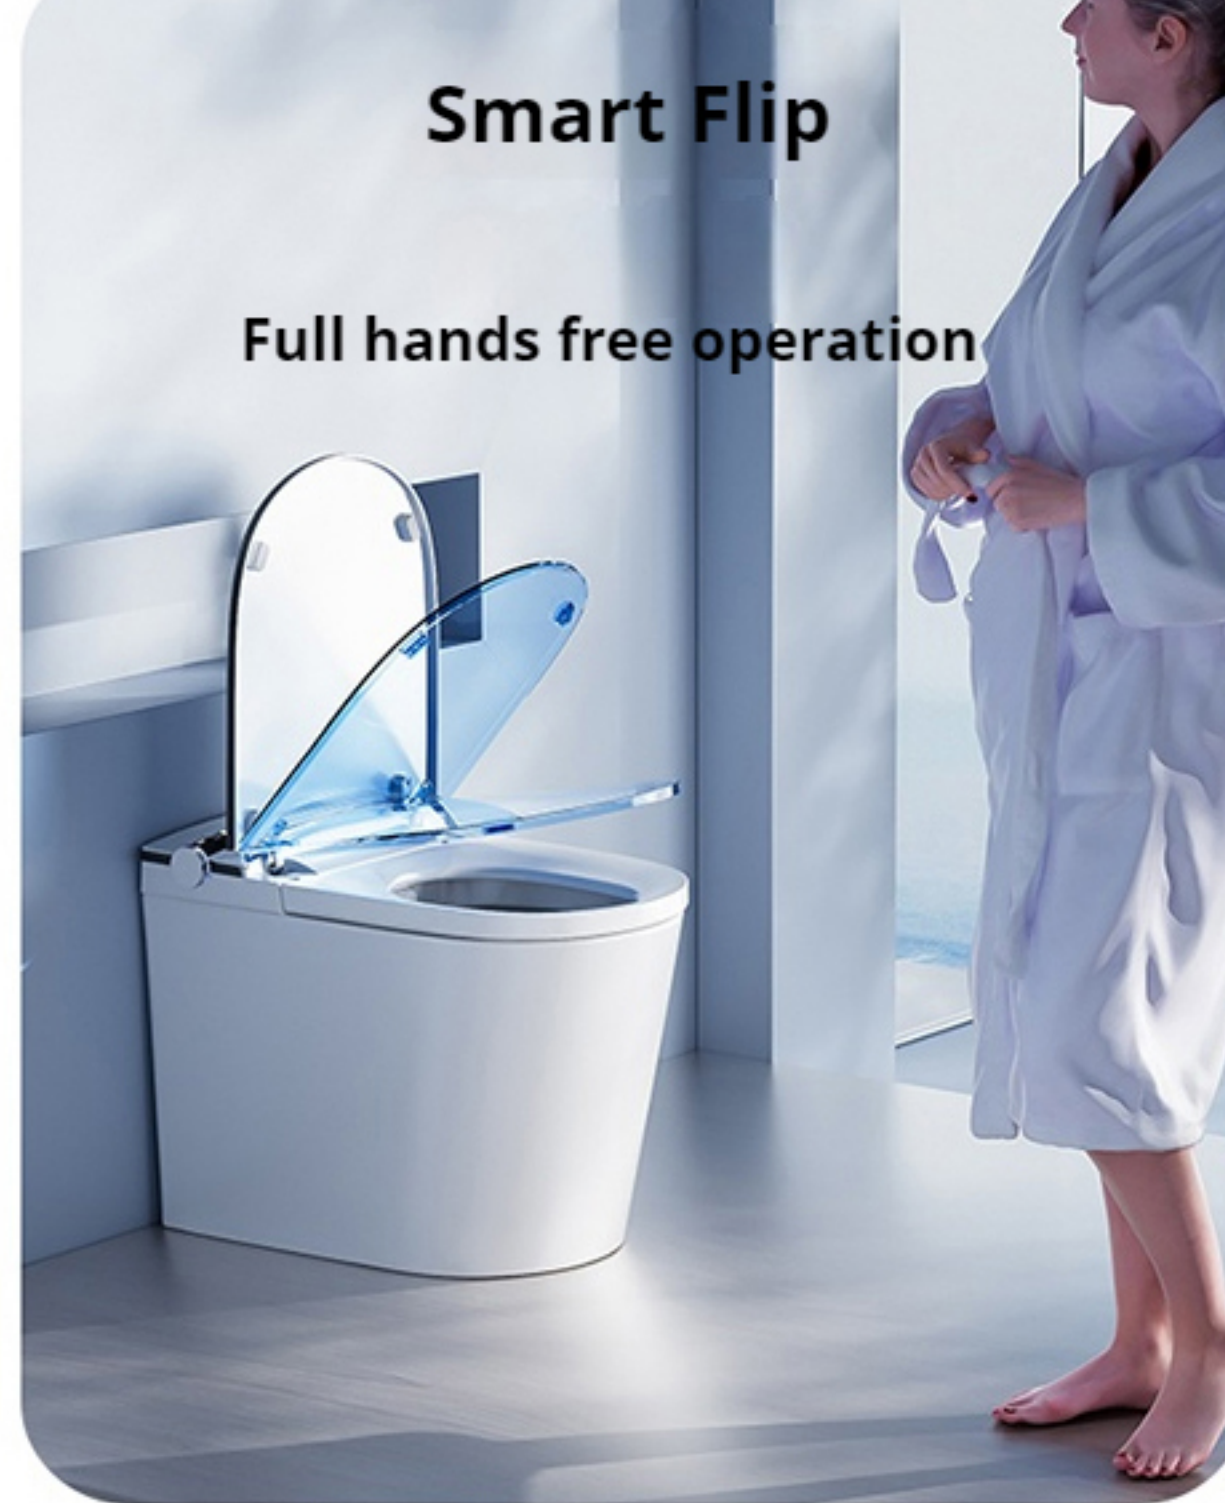

UV sterilization

Smart Flip

Full hands free operation

Exceptional appearance

Minimalist Aesthetics, Pure Freshness

The minimalist and sleek design resembles a work of art in the bathroom.

360° Foam Shield

Antibacterial and Splash-Proof

The foam shield device automatically activates upon sitting, releasing foam upward at 360° to coat the surface. This creates a dense and thick foam layer that covers the water, providing antibacterial protection, odor isolation, and splash prevention.

The foam shield effectively prevents splashes and blocks odors

Odor-proof and splash-proof, both achieved.

Without the foam shield, water splashes everywhere

Dirty water easily splashes onto the skin.

Built-in Aromatherapy Deodorizer

Reject Odors and Restore Freshness

The built-in aromatherapy deodorization system will opening when you sit and turns off when you leave. It releases a fresh scent from the back holes of the toilet, with activated carbon blocks immediately eliminating odors to maintain freshness.

Placement of Aromatherapy Tablets

Easily Replace Aromatherapy Tablets

Smart detection of large or small flushing

From now on, you can have peace of mind

Automatic flushing when you leave the seat, allowing you to focus on your tasks without any worries. Smart flushing, which is energy-saving and environmentally friendly.

Automatic Sensor to open the Cover

One step closer to know what you need

The cover automatically flips up when you get close to the toilet, and the sensing distance can be adjusted freely, allowing you to use the toilet without any contact, which is more cleaner and hygienic
