Not exposed more beautiful

360 ° Dense Foam Shield

Don't worry about water spills

Equipped with 360 ° rotating jet technology,
the foam covers the inner wall in all directions
to prevent splashing, anti-sticking and odor separation

360°

Rotary jet

Foam full coverage

Health Protection

No dirt

Stop breeding

Block odor

Effective suppression of foam shield

The function of the foam shield is to cover a layer of foam on the surface of the water.
After the excrement enters the water, due to the foam layer, it avoids splashing water,
thereby playing a healthy role in the toilet.

Foam Shield Tightly Stink

The dense foam forms a protective layer on the water surface,
blocking odor bacteria, so that the odor cannot overflow and spread,
and the bathroom environment is more hygienic without being troubled
by embarrassing odor when going to the toilet.

Add a convenience to life

Intelligent Toilet

Smart Net New Upgrade

Easy foot touch

Open the cover, flush without bending over

The human body approaches the automatic induction flip cover, lifts its foot to touch the bottom button, turns the toilet over, and stands in the kick mode.

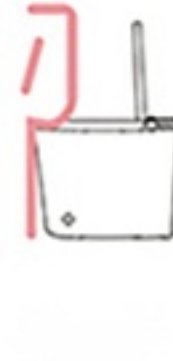

There is no need to worry about touching it by mistake in a small space, and there is no need to bend over and dirty hands in the whole process.

Applicable scene for women (automatic opening+automatically closed and flushed)

Automatic opening

(switchable foot touch)

In use

Automatic flushing and

closing cover

Men's applicable scene (Automatic opening, foot touch open the seat ring, foot touch to flush and then close the cover)

Intelligent Toilet

Comprehensive protection

Double line of defense

No blood culture

First line of defense: clean seat

The second line of defense: rare earth glaze

24-hour long-term antibacterial rate reaches 99.9%

The third layer: anti-fouling glaze

The second layer: high purity glaze

The first layer: embryo base glaze

Fresh air aromatherapy

Breathe freely and use the toilet without any burden

Built-in aromatherapy, blowing out from the small holes on the back of the toilet to keep the bathroom fresh at all times, so you don't have to worry about the embarrassment of odor when taking turns to use the toilet

The single-hole nozzle design aids in focusing the massage water flow, stimulating the anal external sphincter to induce the urge to defecate. Specifically designed for those with difficulty in bowel movements, it provides a smooth and relieving experience, resolving your unspoken discomfort.

Before Bowel Movement

Intestinal Blockage,
Difficulty in Defecation

Bowel Cleaning

Water Pressure Massage,
Enhance the Urge to Defecate

After Bowel Movement

Intestinal Moisturization,
Smooth Excretion

Details can't be ignored

01 Soft Close

Quiet opening and closing at night

02 LED display screen

Real-time usage status display
