UV sterilization

Smart Flip

Full hands free operation

Outstanding Appearance

Minimalist Aesthetics, Pure Freshness

Built-in Aromatherapy deodorizer

Reject odor and Restore Freshness

The built-in aromatherapy deodorization system will opening when you sit and turn off when you leave the seat. It will release aroma scent from the hole behind the toilet, and the activated carbon block can be deodorized immediately to keep fresh.

Placement of Aromatherapy Tablets

Easily Replace Aromatherapy Tablets

360° Foam Shield

Antibacterial and Splash-Proof

The foam shield device automatically activates upon sitting, releasing foam upward at 360° to coat the surface. This creates a dense and thick foam layer that covers the water, providing antibacterial protection, odor isolation, and splash prevention.

The foam shield effectively prevents splashes and blocks odors

Odor-proof and splash-proof, both achieved.

Without the foam shield, water splashes everywhere

Dirty water easily splashes onto the skin.

Capacitive Foot-touch

Sensitive foot-touch open the cover seat

According to the sensing distance of the bathroom size, the cover can be opened and flushed automatically, and it's full-hand free operation.

For Men
